ABOUT OUR SEEDLINGS

Seedling stock is supplied by Ferguson Forest Center in Kemptville, Ontario. All trees and shrubs are one to three years old and are grown from seeds collected in this region. This stock will range in size from 6" to 18" depending on the species. Trees are bare root, and they must be planted soon after they are picked up. Trees are available on a first come, first served basis.

WHY PLANT TREES?

Reforestation improves our environment by providing wildlife habitat, preventing erosion, conserving energy, improving air quality, and reducing the threat of flooding. In addition, when you plant trees, you improve the aesthetics and the value of your property.

WHAT ABOUT SITE PREPARATION, PLANTING AND TENDING?

Site preparation and tending is important to the survival rate of your trees. Quinte Conservation strongly recommends that you prepare the site

and tend to your trees after you plant them. Failure to perform these activities will result in increased competition from grass and weeds: as well a greater potential for rodent damage. Tree survival is affected by many factors and trees are not guaranteed.

WHEN WILL MY ORDER ARRIVE AND WHERE DO I PICK UP?

Your trees will be available for pick-up in early May. Trees come in large bags that weigh about 20lbs with 100 to 300 trees per bag. Payment must be received with your order form and you will be notified of pick up times and dates.

DIRECTIONS TO GRILLS ORCHARDS—COLD STORAGE

Exit Hwy #401 at Wallbridge Loyalist Road (Belleville) and head north. Take the Grills Road (your first left) approximately 4kms to Grill's Orchards. The large gray steel building (#886) on the north side of the road is the cold storage.
