

WATERSHED WORKSHOP

Discover our connection to water and how our choices impact it. Develop an action plan to protect and conserve this vital resource.

Where does our water come from?

Where does it go?

What can we do to protect our water?

Quinte Conservation is offering virtual or on-the-schoolground Watershed Workshops to classes in grades K to 8

STUDENTS WILL EXPLORE...

KINDERGARTEN

How we care for water, and all life, here and around the world.

GRADE 3

How we impact water, with connections to soil health and erosion.

GRADE 6

Actions for water protection with connections to healthy ecosystems and biodiversity.

GRADE 1

Actions we can take to maintain a healthy environment for all life.

GRADE 4

How we can protect water, a vital resource, and enhance habitat for all life.

Grade 7

How human activities impact water and ecosystems and create a local action plan.

GRADE 2

How our choices impact water and explore actions to conserve and protect it.

GRADE 5

How various sectors impact water and explore actions to protect this vital resource.

GRADE 8

How local water quantity and quality is impacted. Develop an action plan to protect it.
